

IN THE SPECIFICATION

Please amend a portion of the specification on lines 13-17 on page 14 as follows:

As illustrated by the cross-hatched diagram in Fig. 4,
showing part of the beam cross-sectional areas 45 of the diode
lasers 43, for laser treatment of a semiconductor wafer [[40]] 14
having a reduced diameter in comparison with the semiconductor
wafer 12, only a part of the diode laser 43 according to a partial
matrix 53 needs be activated.
